PIMCO Income Fund

FUND DESCRIPTION

The Income Fund is a portfolio of a broad range of intermediate-duration, high-quality bonds that is actively managed to maximize current income while maintaining a relatively low risk profile, with a secondary goal of capital appreciation.

INVESTOR BENEFITS

This Fund seeks to meet the needs of investors whose primary goal is a high level of current income. The Fund seeks to generate a competitive distribution yield and monthly dividends.

Potential benefits of this Fund include:

- A competitive yield - Income Fund yield is competitive with many savings vehicles
- Multiple sources of value - the Fund utilizes a broad opportunity set of fixed income securities
- High credit quality - the Fund invests in high-quality instruments issued across the credit spectrum
- Liquidity - the Fund structure is designed to provide liquidity when needed

THE FUND ADVANTAGE

The Fund utilizes multiple sectors of the bond market in an effort to generate a competitive and consistent distribution yield and monthly dividend. Managed to pursue efficient income generation, the strategy also focuses on PIMCO total-return ideas in an effort to maximize capital appreciation and risk-adjusted returns relative to its peers. This approach seeks to provide consistent income over the long term.

VALUE OF CORE STRATEGIES

An allocation to PIMCO fixed-income strategies may be beneficial as a core part of a balanced portfolio. Bonds can provide a steady source of income and, as part of a total-return strategy, potentially produce capital gains as well. An allocation to a PIMCO fixed-income strategy in a portfolio also can offer diversification and serve as a hedge against volatility and risks in other asset classes, particularly in times of economic uncertainty or deflation. Long-duration bonds can be used to diversify a broader core allocation to fixed income and help an overall portfolio's match to longer-term liabilities.

ABOUT THE BENCHMARK

Benchmark Duration (yrs) 4.30

Barclays Capital U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and principal value will fluctuate, so that Fund shares may be worth more or less than their original cost when redeemed. Performance data current to the most recent month-end is available at www.pimco-funds.com or by calling (800) 927-4648.

The P Class inception on 04/30/2008, which may be different than the inception date of the Fund. For the period prior to the inception date of the P Class shares, performance information is based on the performance of the Fund's Institutional Class shares, adjusted to reflect the actual distribution and/or service (12b-1) fees and other expenses paid by P class shares.

ABOUT PIMCO

PIMCO, founded in 1971, is a global investment solutions provider managing retirement and other assets for more than 8 million people in the U.S. and millions more around the world. Our clients include state, local and union pension and retirement plans whose beneficiaries come from all walks of life, including educators, healthcare workers and public safety employees. We also serve individual investors, working in partnership with financial intermediaries such as Registered Investment Advisors, broker/dealers, trust banks and insurance companies. We are advisors and asset managers to central banks, corporations, universities, foundations and endowments. PIMCO has offices in North America, Europe, Asia and Australia and is owned by Allianz Global Investors, a subsidiary of the Munich-based Allianz Group, a leading global insurance company.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information are contained in the fund's prospectus and summary prospectus, if available, which may be obtained by contacting your PIMCO representative. Please read them carefully before you invest or send money.

The performance figures presented reflect total return performance, changes in share price, and reinvestment of dividend and capital gain distributions. All periods longer than one year are annualized. Interest expenses netted from the Total Expenses are based on the amounts incurred during the Fund's most recent fiscal year as a result of entering into certain investments; the amount of interest expense (if any) will vary. The high performance of this portfolio is due to exceptional performance in the sector. This level of performance is not guaranteed and should not be expected in the future.

Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. Gov't Related may include nominal and inflation-protected Treasuries, agencies, interest rate swaps, Treasury futures and options, and FDIC-guaranteed corporate securities.

Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Mortgage and asset-backed securities may be sensitive to changes in interest rates, subject to early repayment risk, and their value may fluctuate in response to the market's perception of issuer creditworthiness; while generally supported by some form of government or private guarantee there is no assurance that private guarantors will meet their obligations. High-yield, lower-rated, securities involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. The Fund is non-diversified, which means that it may concentrate its assets in a smaller number of issuers than a diversified fund.

The value of most bond funds and fixed income securities are impacted by changes in interest rates. Bonds and bond funds with longer durations tend to be more sensitive and more volatile than securities with shorter durations; bond prices generally fall as interest rates rise.

Past rankings are no guarantee of future rankings. Rankings begin with the inception of the actual share class. Lipper does not take into account sales charges.
